

# Boca festival's heart of arts

DAVID BEAN

Eroica Trio

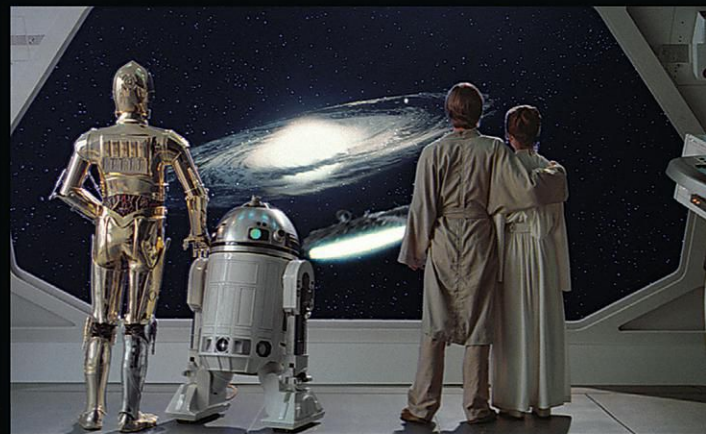

By Greg Carannante

**Y**ou say you love the arts? Well, if there's not at least one thing that strikes your fancy at the sumptuous smorgasbord of performances and programs known as this year's Festival of the Arts BOCA, then perhaps you're not *really* an arts lover, are you?

In its 14th year, the festival returns to both the Amphitheater and Cultural Arts Center in Mizner Park Feb. 28-March 8 with a theme of "A Season of Heroes" — which, honestly, seems a bit peripheral. The real hero of this fest may be its executive director, Joanna Marie Kayea, who has ensured that artistic quality across the board is the main attraction of a rich and varied lineup.

On either edge of that bill are classic Yoda (confused not to be with today's Baby Yoda sensation) in an orchestra-accompanied screening of *The Empire Strikes Back*; and psychologist Dr. Laurie Santos, professor of Yale University's most popular class ever, "Psychology and the Good Life."
